- Interested in all aspects of computing, willing to learn any language, read any book, and take as many courses as I need to reach my highest potential.
- In my spare time I love learning about networking and gaining a higher understanding of cyber security and all the work that goes into supporting technology for the world to enjoy.
 - Dedicated to kaizen – the Japanese art of continuous development.

SKILLS

- JavaScript | React | Full Stack | UI/UX
- APIs | Git | Node | 3D Modelling | Three.js
- Express | Python | Blender | All Common OS
- I like to work as a part of a team collaborating to achieve a goal that together can be solved.
- A deep passion and drive for solving problems and implementing solutions.
- See people's ideas and views as a potential to learn, engage and be a part of something great.

EXPERIENCE

CYBERMAN LABS - PERSONAL BUSINESS

Worked alongside an established full stack developer assisting with the design of ecommerce sites, creating UI/UX designs that exponentially boosted user's sales and company growth and expansion.
